

The VELUX Sun Tunnel® Solar Night Light

Produces low-level light after the sun sets
so you can enjoy light day *and* night.

This low-profile night light consists of a 3" x 7" solar panel that charges two 'AA' batteries, which power a series of LED lights. The three LEDs diffuse low-level light automatically when no daylight is detected, thereby providing enough light to navigate any late-night trips to the bathroom or kitchen!

- Mounts discreetly in seconds
- Charges in under six hours in ideal conditions¹
- Provides light for 72 hours when fully charged

Available for VELUX Rigid,
Residential Sun Tunnels®

* Federal Solar Tax credit applies to entire Sun Tunnel® purchase and installation. For detailed information visit: veluxusa.com/go-solar
